# **EDUCATION**

Anticipated 2028

December 2022

August 2021

Bachelor of Science - Ecology, Behavior, and Evolution (GPA: 3.7)

# **RESEARCH EXPERIENCE**

Graduate Student Researcher - Advisor: Leslie Ries

Researching the effects of an invasive host plant and climate stressors on the overwintering survival of Baltimore checkerspot (Euphydryas phaeton) caterpillars. Research includes rearing E. phaeton caterpillars on a native host plant or invasive host plant and exposing caterpillars to winter heatwaves and drought conditions. RNA-seq will be used to determine differentially expressed genes across treatment groups, and identify potential metabolic pathways upregulated in response to heat waves and/or drought.

# University of California, San Diego

**Georgetown University** 

**Georgetown University** 

Doctor of Philosophy - Biology University of California, San Diego

Master of Science - Biology (GPA: 4.0) University of California, San Diego

Graduate Student Researcher - Advisor: James Nieh

Investigated the thermal tolerance of feral and managed honey bees (Apis mellifera) in San Diego. The research focused on honey bee survival following exposure to heat shock or cold shock. Results indicated that feral honey bees had greater heat tolerance and no difference in cold tolerance in comparison to managed honey bees. January 2021 - August 2021

# University of California, San Diego

# Undergraduate Student Researcher - Advisors: James Nieh, Amy Geffre

Assisted a graduate student in a research project focused on viral infections of feral and managed honey bees (Apis mellifera). The research included viral amplification and monitoring the survival of feral and managed honey bees in laboratory survival trials.

# **TEACHING EXPERIENCE**

#### **Georgetown University**

Lead laboratory section for a class of 27 students, perform grade-oversight, and hold office hours as a Graduate Teaching Assistant for BIOL-1800: Ecology.

#### University of California, San Diego

September 2019 - August 2022

Led discussion groups and provided guidance for 312 total students over the course of 9 quarters.

# Head Instructional Assistant for BILD 1: The Cell (2 quarters, 75 students) and BILD 3: Organismic and **Evolutionary Biology** (2 quarters, 122 students)

Undergraduate Instructional Assistant for BILD 1: The Cell (4 quarters, 80 students) and BICD 100: Genetics (1 quarter, 35 students)

# AWARDS

| Maryland Native Plant Society Research Grant (\$1066.40)        | April 2024    |
|---|---------------|
| Animal Behavior Society Diversity Travel Award (\$145)          | June 2022     |
| Jeanne Anne Nieh Memorial Fellowship (\$1,000)                  | November 2021 |
| Triton Research & Experiential Learning Scholar Award (\$1,000) | June 2021     |

August 2023 - current

August 2024 - current

September 2021 - June 2023

#### AFFILIATIONS

# Lepidopterists' Society of America (Student Member) Entomological Society of America (Graduate Student Member)

March 2024 July 2023

# MANUSCRIPT IN PROGRESS

Leeds, A. & Nieh, J.C. "Thermotolerance of scutellata-hybrid honey bees and managed European honey bees (Apis mellifera) in Southern California" In prep.

## **PRESENTATIONS & SYMPOSIA**

Responses to a Changing Climate: Integrating Physiology, Ecology, and Evolution. Member Symposium at Entomology 2024; November 10, 2024; Phoenix, Arizona.

Thermotolerance of feral and managed honey bees with implications for beekeeping. Invited presentation at San Diego Beekeeping Society; May 13, 2024; San Diego, California.

Heat and cold tolerance of feral and managed honey bees (Apis mellifera) in San Diego, California. 10-minute student talk presented at Entomology 2023; November 6, 2023; National Harbor, Maryland.

Preliminary data suggest feral honey bees tolerate thermal stress better than managed honey bees. Poster presented at Animal Behavior Society 2022; July 20, 2022; San José, Costa Rica.

# **MENTORSHIP**

Undergraduate students: Katrina Saam (UC San Diego), Ella Camp (Georgetown University), Zoe Schaffer (Georgetown University), Nikhil Yeddula (Georgetown University).

## **OUTREACH & VOLUNTEER EXPERIENCE**

**Biology Organization of Graduate Students (BOGS)** Social Chair. Plan and carry-out social events that bring the graduate student community together, including coffee hours and happy hours.

# Justice, Equity, Diversity, and Inclusion Committee (JEDI)

New Student Bootcamp Organizer. Worked with a team of four committee members to create and implement a three-day workshop series designed to help incoming graduate students develop skills to succeed in the graduate program.

# **Science Communication Instagram Account**

@anngebees. A personal instagram account with the goals of communicating my personal research and sparking a deeper curiosity and interest in insects and entomology.

# **Spectrum News SoCal**

Interviewed by a local reporter (Bree Steffen) to share the results of my honey bee research project for a general audience.
